# elegant *entertaining*

An expansive and elegant kitchen awaits guests in this newly remodeled Wyoming kitchen. The homeowners love to entertain and requested a kitchen that would be a natural and comfortable gathering place for groups of all sizes. Now, they have a beautiful space for leisurely intimate breakfasts and lavish parties alike.

Opening up the kitchen started with removing a wall and using space from the dining room. To make the expanded room feel even more airy, we enlarged the sink window to better capture the beauty of the back yard and flood the space with natural light.

We also added a kitchen island to improve entertaining flow and simplify food prep. This island was designed strategically with two tiers. One end of the island is at bar height for easy, comfortable gathering while the counter height on the other end offers the perfect place to prepare and serve food. The island also reduces congestion around the stovetop and ovens, as well as the beverage station and wine bar.

Finely crafted woodwork can be found throughout the kitchen, from the gracious cabinetry to the turned furniture-style legs and bump out at the sink. Even the ceiling is special. The soffits housed complicated heating and plumbing and could not be removed, so they were incorporated into the design with multiple layers of trim to create architectural interest.

The kitchen truly is the heart of the home, and we are proud to have helped this homeowner's dining dreams come to life.
